Unemployment. Environmental damage. Poverty. Economists Victor Claar and Robin Klay critically engage mainstream economic theory and policy recommendations to provide guidance for faithfully and responsibly addressing these and other important economic issues. Affirming that a just and prosperous society depends for its continued success on maintaining the right balance of power among three principal spheres--democratic governments, market-organized economies, and strong moral and cultural institutions--Claar and Klay demonstrate how Christian principles and values guide and undergird a flourishing and just economy. This text is for use in any course needing a survey of the principles of economics.

*International Economics Theory and Policy 10e* Houghton Mifflin

World trade is governed by the rules of the World Trade Organization (WTO), the successor to the General Agreement on Tariffs and Trade (GATT). The WTO sets rules of conduct for the international trade of goods and services and for intellectual property rights, provides a forum for multinational negotiations to resolve trade problems, and has a formal mechanism for dispute settlement. It is the primary institution working, through rule-based bargaining, at freeing trade. In this book, Kyle Bagwell and Robert Staiger provide an economic analysis and justification for the purpose and design of the GATT/WTO. They summarize their own research, discuss the major features of the GATT agreement, and survey the literature on trade agreements. Their focus on the terms-of-trade externality is particularly original and ties the book together. Topics include the theory of trade agreements, the origin and design of the GATT and the WTO, the principles of reciprocity, the most favored nation principle, terms-of-trade theory, enforcement, preferential trade agreements, labor and environmental standards, competition policy, and agricultural export subsidies.
