The impersonality of social relationships in the society of strangers is making majorities increasingly nostalgic for a time of closer personal ties and strong

community moorings. The constitutive pluralism and hybridity of modern living in the West is being rejected in an age of heightened anxiety over the future and drummed up aversion towards the stranger. Minorities, migrants and dissidents are expected to stay away, or to conform and integrate, as they come to be framed in an optic of the social as interpersonal or communitarian. Judging these developments as dangerous, this book offers a counter-argument by looking to relations that are not reducible to local or social ties in order to offer new suggestions for living in diversity and for forging a different politics of the stranger. The book explains the balance between positive and negative public feelings as the synthesis of habits of interaction in

varied spaces of collective being, from the workplace and urban space, to intimate publics and tropes of imagined community. The book proposes a series of interventions that make for public being as both unconscious habit and cultivated craft of negotiating difference, radiating civilities of situated attachment and indifference towards the strangeness of others. It is in the labour of cultivating the commons in a variety of ways that Amin finds the elements for a new politics of diversity appropriate for our times, one that takes the stranger as there, unavoidable, an equal claimant on ground that is not pre-allocated.

Fundamentals of Engineering FE Civil All-in-One Exam Guide Career Examination Passbooks Effective January 2014, the

Fundamentals of Engineering (FE) exams are drastically different. The new format, to be delivered via CBT (computer based testing), will become the norm in 2014. The exam can be taken throughout the year, unlike the twice a year schedule. The syllabus for the new FE CIVIL exam is very different from the one you would have taken if you took the paper test (last one October 2013). The test will now have approximately 5 hours and 20 minutes available for approximately 110 questions. In the past, AM questions were of the 2 minute variety and PM questions were of the 4 minute variety. Now, you have about 3 minutes per question. So, the average pace of the exam is about the same. This book has a full length practice exam with a mix of questions as recommended in the official

syllabus (www.ncees.org). The only reference that should be used is the FE Reference Handbook, 9th edition, preferably the electronic (PDF) version, since the CBT exam will be supported by a PDF version of the handbook rather than a hardcopy. The practice exam contains questions from Mathematics, Probability & Statistics, Computational Methods, Ethics, Engineering Economics, Statics, Dynamics, Mechanics of Materials, Fluid Mechanics, Materials, Hydraulics & Hydrology, Environmental Engineering, Construction, Geotechnical Engineering, Surveying, Structural Analysis & Design & Transportation.
