OECD Health Policy Studies Beating Cancer Inequalities in the EU Spotlight on Cancer Prevention and Early Detection Westminster John Knox Press
 As the philosopher Martin Buber wrote, "All real living is meeting." People like to get together. That's why special events can often work so much better for nonprofit organizations than other, less social types of fundraising programs. From red-carpet galas to Saturday afternoon street fairs, special events offer nonprofits an unparalleled opportunity to both raise money and make friends. Yet for all the benefits—and they are great—inexperience and bad planning can make these events more trouble—and a greater financial drain—than they are worth. *Special Events: Proven Strategies for Nonprofit Fundraising, Second Edition* is the complete guide to making your next nonprofit event the rousing success it can be. Packed with author and development professional Alan Wendroff's realistic insights and pointers, this text provides a logical and comprehensive outline of event planning, with a special emphasis on fitting these events into the larger framework of the nonprofit's organizational goals. Inside you'll find such helpful tools as: Seven goals for a successful event The Master Event Timetable (METT), a proven organizational tool that provides step-by-step guidance through the entire event process A case study explaining in understandable detail how to implement the advice and methods outlined An accompanying CD that includes sample timelines, worksheets, checklists, budgets, writing examples, decision tables, and contracts From choosing the right event to the best way of expressing thanks afterwards, *Special Events* covers all aspects of producing a winning fundraiser for your organization. In addition to the brass tacks of managing logistics, the coverage includes thoughtful discussions on how to take full advantage of the networking, volunteer recruitment, public relations, and motivational opportunities your special event can provide. This updated Second Edition features new information in these areas, plus an entirely new chapter on using the Internet for event planning. With the needs of nonprofit organizations only growing as donations shrink, special events become more and more vital in sustaining the life of these organizations. Nonprofit lay leaders, professionals, and staff, as well as marketing professionals and event planners who work with nonprofits, will all find in *Special Events, Second Edition* a clearly drawn road map leading to fundraising success.

Rereading the Fossil Record presents the first-ever historical account of the origin, rise, and importance of paleobiology, from the mid-nineteenth century to the late 1980s. Drawing on a wealth of archival material, David Sepkoski shows how the movement was conceived and promoted by a small but influential group of paleontologists and examines the intellectual, disciplinary, and political dynamics involved in the ascendancy of paleobiology. By tracing the role of computer technology, large databases, and quantitative analytical methods in the emergence of paleobiology, this book also offers insight into the growing prominence and centrality of data-driven approaches in recent science.

The New Rules of Work Canongate Books

Richard Armstrong and Kirk Morledge present this practical guide for pastoral ministry, offering counsel about a wide range of topics related to a pastor's professional ministry and personal life. Topics include beginning a new ministry, balancing one's personal life and ministry, wrestling with conflict, worrying about church finances, and preaching. This introduction to ministry can function as a textbook as well as an invaluable handbook or desk reference for pastors in the midst of congregational ministry.

English for Mechanical Engineering is written to fulfill students' needs to learn English as a preparatory for job communication. This book is designed to provide an opportunity to develop students' English skills more communicatively and meaningfully. It consists of twenty-eight units. Each unit presents reading, writing, and speaking sections. Reading section consists of pre-reading, reading comprehension and vocabulary exercises related to the topic of the text. In writing section, some structures and sentence patterns are completed with guided writing exercises. Meanwhile, in speaking section, students are provided with models and examples followed by practical activities which are presented in various ways. In addition, students are also equipped with listening comprehension skill which is presented in a separate textbook. The materials have been arranged and graded in accordance with their language levels. Above of all, to improve the quality of this textbook, criticism and suggestions for better editions are highly appreciated.
