KENNEDY YARELI

Get a Grip on Philosophy □□□□□

This concise introduction to philosophy guides readers from the works of Plato and Aristotle to those of Simone de Beauvoir and Michel Foucault. The lively, cartoon-like format — loaded with sidebars, cheeky illustrations, and bulleted points — injects a playful modern tone into potentially obscure subjects. Featured thinkers include Aquinas, Descartes, Wittgenstein, Hume, Heidegger, and Nietzsche.

Reaching Out Routledge
Kekerasan Simbolik Di SekolahPT.
RajaGrafindo Persada

Augustine the Reader Routledge

The proliferation of violence is arguably one of the most crucial topics of concern in an era of ethnic wars on one hand, and cultural debates about what constitutes violence in arenas of pornography, nationalism, race relations, the media, even environmental issues on the other. *Violence and Its Alternatives* fills the existing gap in the literature on violence with essays from the most influential writers in the fields of politics, psychology, sociology, gender studies,

and race studies. This collection has two features not found in any other discussions of violence: first, a full spectrum of views, from now-classic treatments to postmodern considerations; and second, the first interdisciplinary study of nonviolence.

Introducing Cultural and Media Studies Icon Books

Messages, Signs, and Meanings can be used directly in introductory courses in semiotics, communications, media, or culture studies. Additionally, it can be used as a complementary or supplementary text in courses dealing with cognate areas of investigation (psychology, mythology, education, literary studies, anthropology, linguistics). The text builds upon what readers already know intuitively about

signs, and then leads them to think critically about the world in which they live - a world saturated with images of all kinds that a basic knowledge of semiotics can help filter and deconstruct. The text also provides opportunities for readers to do "hands-on" semiotics through the exercises and questions for discussion that accompany each chapter. Biographical sketches of the major figures in the field are also included, as is a convenient glossary of technical terms. The overall plan of the book is to illustrate how message-making and meaning-making can be studied from the specific vantage point of the discipline of semiotics. This third edition also includes updated discussions of information technology throughout, focusing especially on how meanings are

now negotiated through such channels as websites, chat rooms, and instant messages.

Identity and Difference University of Georgia Press

Timing for Animation has been one of the pillars of animation since it was first published in 1981. Now this 40th anniversary edition captures the focus of the original and enhances this new edition with fresh images, techniques, and advice from world-renowned animators. Not only does the text explore timing in traditional animation, but also timing in digital works. Vibrant illustrations and clear directions line the pages to help depict the various methods and procedures to bring your animation to life. Examples include timing for digital production, digital

storyboarding in 2D, digital storyboarding in 3D, and the use of After Effects, as well as interactive games, television, animals, and more. Learn how animated scenes should be arranged in relation to each other, how much space should be used, and how long each drawing should be shown for maximum dramatic effect. All you need to breathe life into your animation is at your fingertips with Timing for Animation. Key Features: Fully revised and updated with modern examples and techniques Explores the fundamentals of timing, physics, and animation Perfect for the animation novice and the expert Get straight to the good stuff with simple, no-nonsense instruction on the key techniques like stretch and squash, animated cycles, overlapping, and

anticipation. Trying to time weight, mood, and power can make or break an animation—get it right the first time with these tried and tested techniques. Authors Harold Whitaker was a BAFTA-nominated professional animator and educator for 40 years; many of his students number among today's most outstanding animation artists. John Halas, known as "The father of British animation" and formerly of Halas & Batchelor Animation Studio, produced more than 2,000 animation films, including the legendary Animal Farm (1954) and the award-winning Dilemma (1981). He was also the founder and president of the International Animated Film Association (ASIFA) and former Chairman of the British Federation of Film Societies. Tom Sito is Professor of

Animation at the University of Southern California and has written numerous books and articles on animation. Tom's screen credits include Shrek (2001) and the Disney classics Who Framed Roger Rabbit (1988), The Little Mermaid (1989), Beauty and the Beast (1991), Aladdin (1992), and The Lion King (1994). In 1998, Tom was named by Animation Magazine as one of the 100 Most Important People in Animation.

Religion and Cyberspace SAGE

In this new edition of his widely adopted Cultural Theory and Popular Culture: An Introduction, John Storey has extensively revised the text throughout. Palgrave Macmillan

Without doubt, Jean Baudrillard is one of the most important figures currently working in the area of sociology an

dcultural studies, but his writings infuriate as many people as they intoxicate. This collection provides a wide-ranging, measured assessment of Baudrillard's work. The contributors examine Baudrillard's relation to consumption, modernity, postmodernity, social theory, feminism, politics and culture. They attempt to steer a clear course between the hype which Baudrillard himself has done much to generate, and the solid value of his startling thoughts. Baudrillard's ideas and style of expression provide a challenge to established academic ways of proceeding and thinking. The book explores this challenge and speculates on the reason for the extreme responses to Baudrillard's work. The appeal of Baudrillard's arguments is clearly

discussed and his place in contemporary social theory is shrewdly assessed. Baudrillard emerges as a chameleon figure, but one who is obsessed with the central themes of style, hypocrisy, seduction, simulation and fatality. Although these themes abound in postmodern thought, they are also evident in a certain strand of modernist thought - one which embraces the writings of Baudelaire and Nietzsche. Baudrillard's protestation is that he is not a postmodernist is taken seriously in this collection. The balanced and accessible style of the contributions and the fairness and rigour of the assessments make this book of pressing interest to students of sociology, philosophy and cultural studies.

Philosophy and the Young Child

Psychology Press

Quest for the Red Sulphur: The Life of Ibn Arabi is undoubtedly a landmark in Ibn Arabi studies. Until the publication of this book, anyone who wanted to learn about the life of Ibn Arabi has had little choice of material to work from. This major study by Claude Addas is based on a detailed analysis of a whole range of Ibn Arabi's own writings as well as a vast amount of secondary literature in both Arabic and Persian. The result is the first-ever attempt to reconstruct what proves to have been a double itinerary: on the one hand, the journey that took Ibn Arabi from his native Andalusia to Damascus - and on the other hand, the 'Night Journey' which carried him along the paths of asceticism and prayer to the ultimate stage of revelation of his mystic

quest.

Pricing has a substantial and immediate impact on profitability. Most companies, however, still use costs or competition as a main basis for setting prices. Product or business model innovation has a high priority for many companies whereas innovation in pricing has received scant attention. This book examines how innovation in pricing can drive profits. The text examines innovation in pricing from four complementary perspectives. Innovation in Pricing Strategy illustrates how companies implement innovative pricing strategies, such as customer value-based pricing. Innovation in Pricing Tactics deals with innovative tools to measure and increase customer

willingness to pay and to communicate value to B2B and B2C customers.

Innovation in Organizing the Pricing Function looks at state-of-the art approaches to embed the pricing function in the organization.

Psychological Aspects of Pricing illustrates how companies can influence customer perceptions of value and price in their question to implement innovation in pricing. This edited volume brings together 26 articles from academics, business practitioners and consultants. Authors are from the world's largest companies, leading research-based universities and consulting companies specialized in pricing. This book is the only book dedicated to innovation in pricing and an essential read for business executives

and pricing managers wishing to treat innovation in pricing as seriously as they treat product or business model innovation.

Violence and Its Alternatives Routledge
Jean Baudrillard arouses strong opinions. In this collection of his most important interviews the reader gains a unique and accessible overview of Baudrillard's key ideas. The collection includes many interviews that appear in English for the first time as well as a fascinating interview and encounter between the editor and Baudrillard in Paris.

A Primer on Postmodernism Palgrave
Macmillan

George Ritzer is one of the leading social and cultural commentators of the present day. In this essential new book he considers some of the main

tendencies in contemporary social theory. Included here are Ritzer's latest reflections on the uses and misuses of metatheory. According to Ritzer, sociology is a multiparadigm science. The differences and intensities of rivalries between paradigms are often very confusing for students and even for professional sociologists. This book seeks to find a way out of the confusion by sketching out the lineaments of a new integrated sociological paradigm and demonstrates how this paradigm can be applied. It shows the various ways in which Ritzer has developed rationalization theory to shed light on professional integration, the shape of consumer culture, hyperrationality and the state of sociology today.

Quest for the Red Sulphur Harvard

University Press

The desire to acquire luxury goods and leisure services is a basic force in modern life. This work explores both the historical origins and world-wide appeal of this relatively modern phenomenon.

Timescapes of Modernity CRC Press

Jean Baudrillard's classic text was one of the first to focus on the process and meaning of consumption in contemporary culture. Originally published in 1970, the book makes a vital contribution to current debates on consumption. The book includes Baudrillard's most organized discussion of mass media culture, the meaning of leisure, and anomie in affluent society. A chapter on the body demonstrates Baudrillard's extraordinary prescience for flagging vital subjects in

contemporary culture long before others.

This English translation begins with a new introductory essay.

Consumerism in World History

Canadian Scholars' Press

In the twenty-first century, religious life is increasingly moving from churches, mosques and temples onto the Internet. Today, anyone can go online and seek a new form of religious expression without ever encountering a physical place of worship, or an ordained teacher or priest. The digital age offers virtual worship, cyber-prayers and talk-boards for all of the major world faiths, as well as for pagan organisations and new religious movements. It also abounds with misinformation, religious bigotry and information terrorism. Scholars of religion need to understand the

emerging forum that the web offers to religion, and the kinds of religious and social interaction that it enables. Religion and Cyberspace explores how religious individuals and groups are responding to the opportunities and challenges that cyberspace brings. It asks how religious experience is generated and enacted online, and how faith is shaped by factors such as limitless choice, lack of religious authority, and the conflict between recognised and non-recognised forms of worship. Combining case studies with the latest theory, its twelve chapters examine topics including the history of online worship, virtuality versus reality in cyberspace, religious conflict in digital contexts, and the construction of religious identity online. Focusing on key

themes in this groundbreaking area, it is an ideal introduction to the fascinating questions that religion on the Internet presents.

Messages, Signs, and Meanings Indiana University Press

'A highly topical, interesting and lively analysis of ordinary internet use, based on both theoretically competent reflections and sound ethnographic material' - Joost van Loon, Reader in Social Theory at Nottingham Trent University Internet Society investigates internet use and its implications for society through insights into the daily experiences of ordinary users. Drawing on an original study of non-professional, 'ordinary' users at home, this book examines how people interpret, domesticate and creatively appropriate

the Internet by integrating it into the projects and activities of their everyday lives. Maria Bakardjieva's theoretical framework uniquely combines concepts from several schools of thought (social constructivism, critical theory, phenomenological sociology) to provide a conception of the user as an agent in the field of technological development and new media shaping. She: - examines the evolution of the Internet into a mass medium - interrogates what users make of this new communication medium - evaluates the social and cultural role of the Internet by looking at the immediate level of users' engagement with it - exposes the dual life of technology as invader and captive; colonizer and colonized This book will appeal to academics and researchers in social

studies of technology, communication and media studies, cultural studies, philosophy of technology and ethnography.

Jurnalisme Siber Routledge

Timescapes of Modernity explores the relationship between time and environmental and socio-cultural concerns. Using examples such as the BSE crisis, the Sea Empress oil pollution and the Chernobyl radiation Barbara Adam argues that environmental hazards are inescapably tied to the successes of the industrial way of life. Global markets and economic growth; large-scale production of food; the speed of transport and communication; the 24 hour society and even democratic politics are among the invisible hazards we face. With this unique 'timescape'

perspective the author dislodges assumptions about environmental change, enables a rethinking of environmental problems and provides the potential for new strategies to deal with environmental hazards.

Women, the Recited Qur'an, and Islamic Music in Indonesia Wm. B. Eerdmans Publishing

Shows how the Internet has created an environment for new forms of social interaction, and investigates the moral issues connected with its use, including freedom of speech, copyright, and censorship

Timing for Animation, 40th Anniversary Edition Indiana University Press

Examines the reasons why music education should be transformed and suggests alternative educational modes and strategies__

Critical Issues and Practices in Gifted Education Oxford University Press

Buku ini menggambarkan berbagai bentuk kekerasan simbolik yang terjadi di sekolah. Bourdieu, seorang sosiolog Prancis meyakini bahwa sekolah merupakan tempat yang paling tepat untuk menyuburkan terjadinya praktik-praktik kekerasan simbolik ini. Kekerasan simbolik bukanlah kekerasan fisik maupun psikologis. Bila kedua bentuk kekerasan ini wujudnya dapat dengan mudah dikenali, maka kekerasan simbolik sangat sulit dikenali. Namun, kekerasan ini akan terjadi setiap saat, tanpa disadari. Keberadaan kekerasan

ini bahkan sering kali dianggap sebagai gejala yang sangat wajar, sehingga sebagian besar orang akan menerima begitu saja, mereka seolah-olah bersedia menempatkan diri mereka sebagai korban kekerasan simbolik dengan lapang dada, mereka rela menjadi objek dan korban kekerasan. Buku ini menjelaskan mengenai apa itu kekerasan simbolik, mengapa kekerasan simbolik dapat dilakukan dengan mudah

di sekolah, dan bagaimana mekanisme terjadinya kekerasan simbolik di sekolah. Selain itu, buku ini juga mengupas strategi kelompok kapitalis dalam melebarkan sayap kekuasaannya di sekolah melalui mekanisme kekerasan ini. Buku ini direkomendasikan bagi mahasiswa, guru, atau pengajar yang lain, serta pemerhati masalah pendidikan.
