 INTRODUCTION 1-1.1 Purpose. This chapter provides a general history of the development of military diving operations.  
 1-1.2 Scope. This chapter outlines the hard work and dedication of a number of individuals who were pioneers in the development of diving technology. As with any endeavor, it is important to build on the discoveries of our predecessors and not repeat mistakes of the past.  
 1-1.3 Role of the

U.S. Navy. The U.S. Navy is a leader in the development of modern diving and underwater operations. The general requirements of national defense and the specific requirements of underwater reconnaissance, demolition, ordnance disposal, construction, ship maintenance, search, rescue and salvage operations repeatedly give impetus to training and development. Navy diving is no longer limited to tactical combat operations, wartime salvage, and submarine sinkings. Fleet diving has become increasingly important and diversified since World War II. A major part of the diving mission is inspecting and repairing naval vessels to minimize downtime and the need for dry-docking. Other aspects of fleet diving include recovering practice and research torpedoes, installing and repairing underwater electronic arrays, underwater construction, and locating and recovering downed aircraft.

The Hammond Organ: Beauty in the B traces the technological and artistic evolution of the B-3 and other tonewheel organs, as well as the whirling Leslie speakers that catapulted the Hammond sound into history. You'll discover the genius that went into the development of Hammond's tonewheel generator, drawbar harmonics, percussion, scanner vibrato and other innovations, as well as the incredible assistance Don Leslie provided for Hammond by creating his famous rotating speaker system. Plus B-3 legends including soul-jazzman Jimmy McGriff and progressive rocker Keith Emerson share their playing techniques; technical experts offer tips on buying, restoring, and maintaining Hammonds and Leslies;

and over 200 photos illustrate historic Hammond organs, Leslie cabinets, and B-3 masters at work.
