InfoWorld is targeted to Senior IT professionals. Content is segmented into Channels and Topic Centers. InfoWorld also celebrates people, companies, and projects.

Integrating E-Business Models for Government Solutions: Citizen-Centric Service Oriented Methodologies and Processes Springer

Digital Humanities is a transformational endeavor that not only changes the perception, storage, and interpretation of information but also of research processes and questions. It also prompts new ways of interdisciplinary communication between humanities scholars and computer scientists. This volume offers a unique perspective on digital methods for and in the

humanities. It comprises case studies from various fields to illustrate the challenge of matching existing textual research practices and digital tools. Problems and solutions with and for training tools as well as the adjustment of research practices are presented and discussed with an interdisciplinary focus.

Challenge of Transport Telematics Springer

This book constitutes the proceedings of the 14th International Conference on Transport Systems Telematics, TST 2014, held in Katowice/Kraków and Ustroń, Poland, in October 2014. The 49 papers included in this volume were carefully reviewed and selected from 125 submissions. The papers provide an overview of solutions being developed in the fields of transport telematics and intelligent transport systems.

Making Innovation Last: Volume 1 Springer Nature

The most comprehensive book on state-of-the-art smart card technology available Updated with new international

standards and specifications, this essential fourth edition now covers all aspects of smart card in a completely revised structure. Its enlarged coverage now includes smart cards for passports and ID cards, health care cards, smart cards for public transport, and Java Card 3.0. New sub-chapters cover near field communication (NFC), single wire protocol (SWP), and multi megabyte smart cards (microcontroller with NAND-Flash). There are also extensive revisions to chapters on smart card production, the security of smart cards (including coverage of new attacks and protection methods), and contactless card data transmission (ISO/IEC 10536, ISO/IEC 14443, ISO/IEC 15693). This edition also features: additional views to the future development of smart cards, such as USB, MMU, SWP, HCI, Flash memory and their usage; new internet technologies for smart cards; smart card web server, HTTP-Protocol, TCP/IP, SSL/TSL;

integration of the new flash-based microcontrollers for smart cards (until now the usual ROM-based microcontrollers), and; a completely revised glossary with explanations of all important smart card subjects (600 glossary terms). Smart Card Handbook is firmly established as the definitive reference to every aspect of smart card technology, proving an invaluable resource for security systems development engineers. Professionals and microchip designers working in the smart card industry will continue to benefit from this essential guide. This book is also ideal for newcomers to the field. The Fraunhofer Smart Card Award was presented to the authors for the Smart Card Handbook, Third Edition in 2008.

Computerworld Springer
"This book provides examinations of the adoption and impact of e-government"--Provided by publisher.

The Airline Business

Springer Science & Business Media

The airline industry is currently faced with its longest and deepest crisis to date: many airlines are losing hundred of millions

of US dollars, several have collapsed entirely and others have been rescued by their governments.

This crisis has been precipitated by external shocks such as the attack on the Twin Towers in New York, the invasion of Iraq and the SARS epidemic. In addition, the effect of these events has been exacerbated by dynamic and potentially destabilizing internal developments.

Comprehensive and thorough, this revealing book gives a detailed analysis of the crucial events and key developments which have impacted, and will continue to impact on the dynamics of the airline industry. Special attention is paid to: the key challenges faced by the airlines such as continued liberalization and 'open skies' the impacts of global alliances new low-cost and no-frills carriers on-line selling and distribution privatization the impact of disasters. Leading industry authority Rigas Doganis examines the future prospects for the changing airline business and assesses alternative policies which could help the sector adapt to the shifting marketplace. Ideal for students, researchers and

professionals in the fields of economics and business, industry and transportation studies, this second edition of his definitive book brings the story right up to date.

Trusted Systems IGI Global

For more than 20 years, Network World has been the premier provider of information, intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations. Readers are responsible for designing, implementing and managing the voice, data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce.

Commerce, Justice, Science, and Related Agencies Appropriations for 2015 Springer

This book presents the most interesting talks given at ISSE 2013 - the forum for the interdisciplinary discussion of how to adequately secure electronic business processes. The topics include: - Cloud Security, Trust Services, eID & Access Management - Human Factors, Awareness & Privacy, Regulations and Policies -

Security Management - Cyber Security, Cybercrime, Critical Infrastructures - Mobile Security & Applications Adequate information security is one of the basic requirements of all electronic business processes. It is crucial for effective solutions that the possibilities offered by security technology can be integrated with the commercial requirements of the applications. The reader may expect state-of-the-art: best papers of the Conference ISSE 2013.

Advanced Solutions of Transport Systems for Growing Mobility IGI Global

This book proposes new technologies and discusses future solutions for ICT design infrastructures, as reflected in high-quality papers presented at the 8th International Conference on ICT for Sustainable Development (ICT4SD 2023), held in Goa, India, on August 3-4, 2023. The book covers the topics such as big data and data mining, data fusion, IoT programming toolkits and frameworks, green communication systems and network, use of ICT in smart cities, sensor networks and embedded

system, network and information security, wireless and optical networks, security, trust, and privacy, routing and control protocols, cognitive radio and networks, and natural language processing. Bringing together experts from different countries, the book explores a range of central issues from an international perspective.

Encyclopedia of E-Commerce, E-Government, and Mobile Commerce Springer

"This book provides fundamental research on the architecture of learning technology systems, discussing such issues as the common structures in LTS and solutions for specific forms such as knowledge-based, distributed, or adaptive applications of e-learning. Researchers, and scholars in the fields of learning content software development, computing and educational technologies, and e-learning will find it an invaluable resource"-- Provided by publisher.

Transdisciplinary Engineering: A Paradigm Shift Springer

This book constitutes the proceedings of the 14th International Conference on Transport Systems Telematics, TST 2014,

held in Katowice/Kraków and Ustroń, Poland, in October 2014. The 49 papers included in this volume were carefully reviewed and selected from 125 submissions. The papers provide an overview of solutions being developed in the fields of transport telematics and intelligent transport systems.

Introduction to Transportation Analysis, Modeling and Simulation Springer

Nature

The book contains essays on current issues in arts and humanities in which peoples and cultures compete as well as collaborate in globalizing the world while maintaining their uniqueness as viewed from cross- and interdisciplinary perspectives. The book covers areas such as literature, cultural studies, archaeology, philosophy, history, language studies, information and literacy studies, and area studies. Asia and the Pacific are the particular regions that the conference focuses on as they have become new centers of knowledge production in arts and humanities and, in the future, seem to be able to grow significantly as a major contributor of

culture, science and arts to the globalized world. The book will help shed light on what arts and humanities scholars in Asia and the Pacific have done in terms of research and knowledge development, as well as the new frontiers of research that have been explored and opening up, which can connect the two regions with the rest of the globe.

Handbook of Research on Strategies for Local E-Government Adoption and Implementation: Comparative Studies

Springer
 The 2002 DEXA, the 13th International Conference on Database and Expert Systems Applications was held on September 2–6, 2002, at the Université Aix-Marseille II, France. The quickly growing field of information systems required the establishment of more specialized discussion platforms (the DaWaK conference, EC-Web conference, eGOV conference and DEXA workshops), and there were held in parallel with DEXA, also in Aix-en-Provence. The resulting book was prepared with great effort. Starting with the preparation of submitted papers, the papers went through the

reviewing process. The accepted papers were revised to final versions by their authors and arranged to the conference program. This year 241 papers were submitted and our thanks go to all who have contributed. The program committee and the supporting reviewers produced altogether about 730 referee reports, on average three reports per paper, and selected 89 papers for presentation. The papers presented here encompass the extensive domain of databases; together with the other conferences and workshops of the DEXA event cluster a vast part of applied computer science was covered. In this way DEXA has blazed the trail. At this point we would like to acknowledge to all institutions which actively supported this conference and made it possible. These are: • IUT (Université Aix – Marseille II), • FAW, • DEXA Association, • the Austrian Computer Society, • and Microsoft Research
Network World IGI Global
 This comprehensive textbook/reference provides an in-depth overview of the key aspects of transportation analysis, with an

emphasis on modeling real transportation systems and executing the models. Topics and features: presents comprehensive review questions at the end of each chapter, together with detailed case studies, useful links, references and suggestions for further reading; supplies a variety of teaching support materials at the book's webpage on Springer.com, including a complete set of lecture slides; examines the classification of models used for multimodal transportation systems, and reviews the models and evaluation methods used in transportation planning; explains traffic assignment to road networks, and describes computer simulation integration platforms and their use in the transportation systems sector; provides an overview of transportation simulation tools, and discusses the critical issues in the design, development and use of the simulation models.

Trends in E-Business, E-Services, and E-Commerce: Impact of Technology on Goods, Services, and Business Transactions IGI Global

This book constitutes the refereed proceedings of the 9th International Conference on Electronic Commerce and Web Technologies, EC-Web 2008, held in Turin, Italy, in September, 2008 in conjunction with DEXA 2008. The 12 revised full papers presented together with 2 invited papers were carefully reviewed and selected from numerous submissions. The papers are organized in five topical sessions on security in e-commerce, social aspects of e-commerce, business process and EC infrastructures, recommender systems and e-negotiations, and Web marketing and user profiling.

Accelerating Knowledge Sharing, Creativity, and Innovation Through Business Tourism Springer

This book constitutes the thoroughly refereed post-

conference proceedings of the International Conference on Trusted Systems, INTRUST 2011, held in Beijing, China, in November 2011. The 21 revised full papers were carefully reviewed and selected from 34 submissions for inclusion in the book. Except these contributed papers the program of INTRUST also consisted of a workshop titled Asian Lounge on Trust, Security and Privacy consisting of six keynote speeches. The papers are organized in topical sections on trusted services, mobile trusted systems, security analysis, cryptographic aspects, trusted networks, implementation, and direct anonymous attestation.

ICT Analysis and Applications Routledge

This book constitutes the proceedings of the 15th International Conference on Transport Systems Telematics, TST 2015, held in Wrocław, Poland, in April 2015. The 35 revised full papers and two short papers included in this volume were carefully reviewed and selected from 115 submissions. The papers provide an overview of solutions being developed

in the fields of transport telematics and intelligent transport systems.

The Future of Intelligent Transport Systems Routledge

Making Innovation Last considers the long term success of a firm. Authored by a trio of top international scholars who present pioneering new work on what it takes to create long term growth, the book examines the internal conditions that are likely to encourage sustainable innovation, as well as what a culture of innovation should look like.

Internet of Things: Smart Systems and Application IGI Global

ISBN : 978-967-2145-84-4

Authors : Nurul Azma Zakaria & Zakiah Ayop

In this chapter in book, there are five chapters which address the development of smart systems and its application in areas such as health, transportation, home security and human detection. These examples would be relevant not only to young researchers or inventors in secondary school, undergraduate and graduates but also to researchers and individuals alike.
