 Committee Serial No. 69. Investigates FPC decision reversal in which FPC conditionally certified, then subsequently denied, application to establish natural gas pipeline from Rock Springs, Wyo., to Southern California.

Reproductive Biology and Early Life History of Fishes in the Ohio River Drainage

Dog's Eye View
 Being an inventor at the dawning of the twentieth century was an exciting time for Weston Fulton, Tennessee's most prolific. The Industrial Revolution was well underway, and technology was changing rapidly. Because of Fulton's numerous inventions and patent requests, the U.S. Patent Office dedicated a room solely to his applications, and the press began calling him the "Edison of the South." His most important invention, the seamless metal bellows, has gone to the bottom of the sea as the triggering device for the U.S. Navy's depth charges and to the surface of the Moon

to help supply drinking water for the astronauts. Dewaine Speaks, a longtime employee of the company founded by Fulton, gives a detailed description of the many ways Fulton's inventions have influenced mankind.

Business and Industry: Cost to environmentalism

CRC Press
 This series fills immense gaps in knowledge of issues related to early life development of fishes in the Ohio basin. Volume I includes families Acipenseridae to Esocidae, Volume II includes the Catostomidae, while Volume III addresses the developmental and morphological issues of catfish and madtoms. This volume describes the characteristics of the
Conference Report to Accompany H.R. 4818 Arcadia Publishing
 Giving Kids the Business exposes the ways in which corporate America is turning schools into profit centers, the curriculum into an advertising vehicle, and children into a cash crop. Learn how market-oriented school reforms take money out of your pocket and lower the quality of public education. This book sounds the alarm over schools being used by marketers to pitch their products to our nations children. }The commercialization of public education is upon us. With much fanfare and plenty of controversy, plans to cash in on our public schools are popping up all over

the country. Educator and social commentator Alex Molnar has written the first book to both document the commercial invasion of public education and explain its alarming consequences. Imagine that your son is given a Gushers fruit snack, told to burst it between his teeth, and asked by his teacher to compare the sensation to a geothermic eruption (compliments of General Mills). Imagine your daughter being taught a lesson about self-esteem by being asked to think about good hair days and bad hair days (compliments of Revlon.) Imagine that to cap off a day of world class learning, your child's teacher shows a videotape that explains that the Valdez oil spill wasn't so bad after all (compliments of Exxon). Giving Kids the Business explains why hot-button proposals like Channel One, an advertising-riddled television program for schools; for-profit public schools run by companies such as the Edison Project and Education Alternatives, Inc.; taxpayer-financed vouchers for private schools; and the relentless interference of corporations in the school curriculum spell trouble for America's future. Anyone curious about how schools are being turned into marketing vehicles, how education is being recast as a commercial transaction, and how children are being cultivated as a cash crop will want to read Giving Kids the Business. } The commercialization of public education is upon us. With much fanfare and plenty of

controversy, plans to cash in on our public schools are popping up all over the country. Imagine that to cap off a day of world class learning, your child's teacher shows a videotape that explains that the Valdez oil spill wasn't so bad after all (compliments of Exxon). Giving Kids the Business explains why hot-button proposals like Channel One, an advertising-riddled television program for schools; for-profit public schools run by companies such as the Edison Project and Education Alternatives, Inc. ; taxpayer-financed vouchers for private schools; and the relentless interference of corporations in the school curriculum spell trouble for America's children. With political races, legislative issues, and judicial challenges regarding education reform from Massachusetts to California, this book will explain what's behind the headlines in every state.

Reactor (LMFBR) Demonstration Plant Hearings, Ninety-second Congress, Second Session ... Congressional Budget Request Weston Fulton in Tennessee: Edison of the South The story of the Edison Schools is a gripping tale of money, kids, and greed. What began in the 1980s as an enterprise to transform public schools quickly became a troubled business battling falling test scores and dismal stock prices. How did the most ambitious for-profit education company in U.S. history lose respect, money, and credibility in such a short time? Revealing how American McEducation went from glory to crisis, The Edison Schools tracks entrepreneur Christopher Whittle's plan to introduce a standardized nationwide curriculum and cut administrative waste. Education specialist Kenneth J. Saltman finds that the critics' predictions came true in Edison schools across the country: Experienced teachers left in droves, students were virtually given answers to standardized tests to drive up scores, and difficult students were "counselored" out.

Routledge

The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States (1789-1824), the Register of Debates in Congress (1824-1837), and the Congressional Globe (1833-1873)

Opinions, Decisions and Orders Routledge

A humorous, motivational, self-help business book that provides valuable insights on how to reduce stress and improve your working life. The "author," a Vizsla dog, uses humor and comparisons to the world of animals to provide solutions on how to achieve a more enjoyable work environment.
